

Deep Learning Powered Holographic Microscopy for Biothreat Detection on Field

Project HoloZcan is announcing its Second Stakeholder Meeting on Wednesday 28 February 2024, in Zielonka, Poland.

Funded by the European Union’s Horizon 2020 research and innovation programme, the project develops comprehensive and innovative means of respiratory, ventilation and environmental biological data sampling that can be used in real-time, standoff or in mobile context, to detect bio-threats in the form of pathogens and bacteria.

In the course of the Project’s life, two Stakeholders’ gathering event are scheduled to connect all project external professional advisors and the discuss the full range of issues related to End Users’ technical expectations in terms of development of specific bio-detection solution in each of the four project scenario categories.

For the Second Meeting, our agenda will give the floor to all 35 Stakeholders, to complete a review of specifications by scenarios, discuss future perspectives and provide final recommendations.

This restricted access venue will combine in-presence attendance, with a full simultaneous online teleconference, for project Stakeholders and Partners, to attend, listen to the presentations and interact with each other’s.

More information about the project can be found at www.HoloZcan.com , and also on LinkedIn at <https://www.linkedin.com/company/holoZcan/mycompany/> as well as on “X” (ex-Twitter) @HoloZcan / Contact email: INFO@HoloZcan.com

This project has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement No 101021723
