

11 September 2023 – Collaboration with NEST Project

We are thrilled to share a recent collaboration between Karolina Tomczyk from Lodz University and Györgyi Bela, Béla Mihalik from the IDEAS Science team. Together, we're delving into innovative ways to disseminate the HoloZcan project and strengthen synergies with the European projects SAFE STADIUM. 🚀

This partnership isn't a new endeavor, as we previously demonstrated our developments together at the Warsaw National Stadium back in May. The HoloZcan project is continuously seeking collaborations with other security-related projects to mutually reinforce our efforts.
