

05 JUL 2023 - CERIS SSRI Meeting in Brussels

'We have discovered an exciting avenue for exploitation: engaging in Pre-commercial procurement (PCP)/ Public procurement of innovative solutions (PPI) projects. Our recent participation in the **CERIS SSRI Workshop on Innovation Procurement (by DG HOME, European Commission)** provided an invaluable opportunity to deepen our understanding of PCPs/PPI and connect with representatives from ongoing projects. Their generous insights and shared experiences have opened up new possibilities for collaboration and advancement in our field.

We appreciate the invaluable cooperation of the [#PEERS project](#) representatives in helping us navigate the complexities of standardization requirements within PCPs.
